A rent-to-own scheme where customers can use the vehicle under a rental agreement and eventually gain full ownership.

EV Consultant

Strategic consultancy for corporations and area management to design an effective energy transition.

- Research & Analysis
- Infrastructure Planning
- Regulatory Compliance

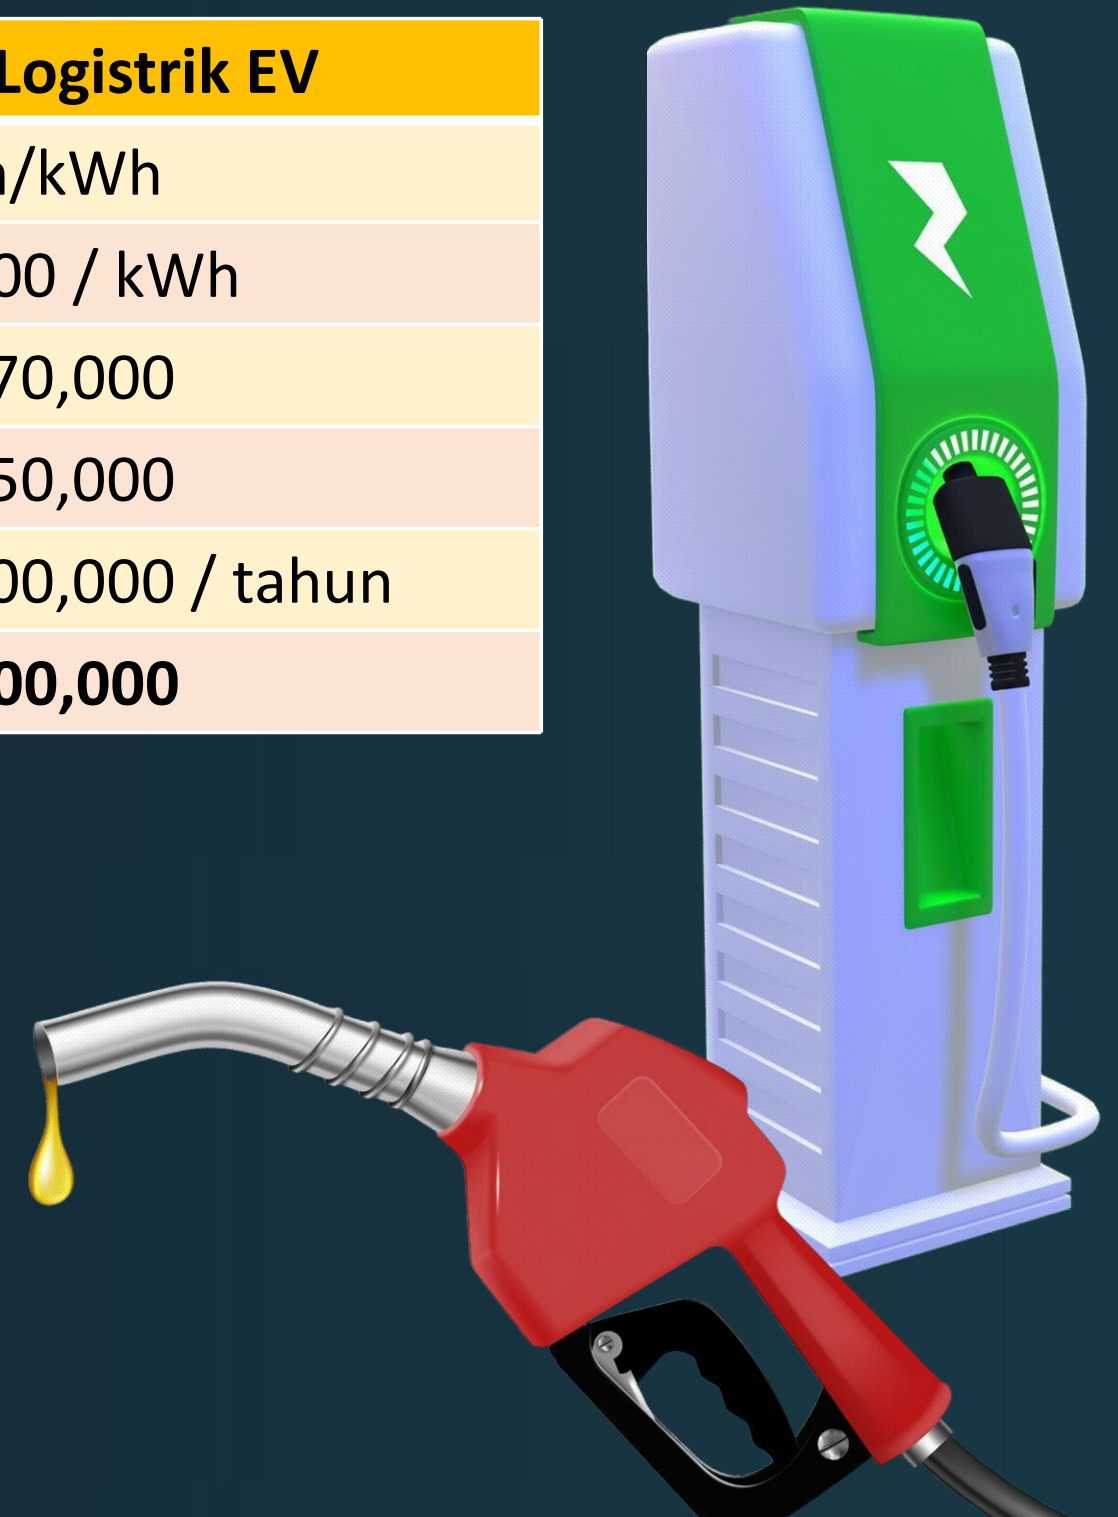

Operation Cost Comparison for ICE & EV

Components	Grand Max (ICE)	Logistik EV
Energy Consumption	± 11 km/liter	± 10 km/kWh
Energy Price	IDR 13,000 / liter	IDR 1,700 / kWh
Cost per 1,000 Km	± IDR 1,183,000	± IDR 170,000
Routine Maintenance Cost	± IDR 800,000	± IDR 150,000
Vehicle Tax	± IDR 3,000,000 / tahun	± IDR 300,000 / tahun
Total Cost per 1,000 km	± IDR 1,700,000	± IDR 400,000

Note:

- The periodic maintenance cost for the Gran Max already includes engine oil, filters, spark plugs, clutch, etc.
- EV vehicle tax is very low because EVs receive a 0% Luxury Goods Sales Tax (PPnBM) incentive and a reduction in Vehicle Ownership Transfer Fee (BBNKB), depending on the province.
- Using an EV saves 76% on operational costs.

Why Choose SSD?

Proactive CRM Support

- 24/7 call center & real time assistance
- Dedicated account manager for every corporate clients

Smart Battery Monitoring System (Ballistic)

- Real-time Battery Monitoring 24/7
- Provides warning for lithium battery conditions

Safety & Insurance Coverage

- Equipped with APAR LFK AF31
- Comprehensive Insurance for vehicle & driver

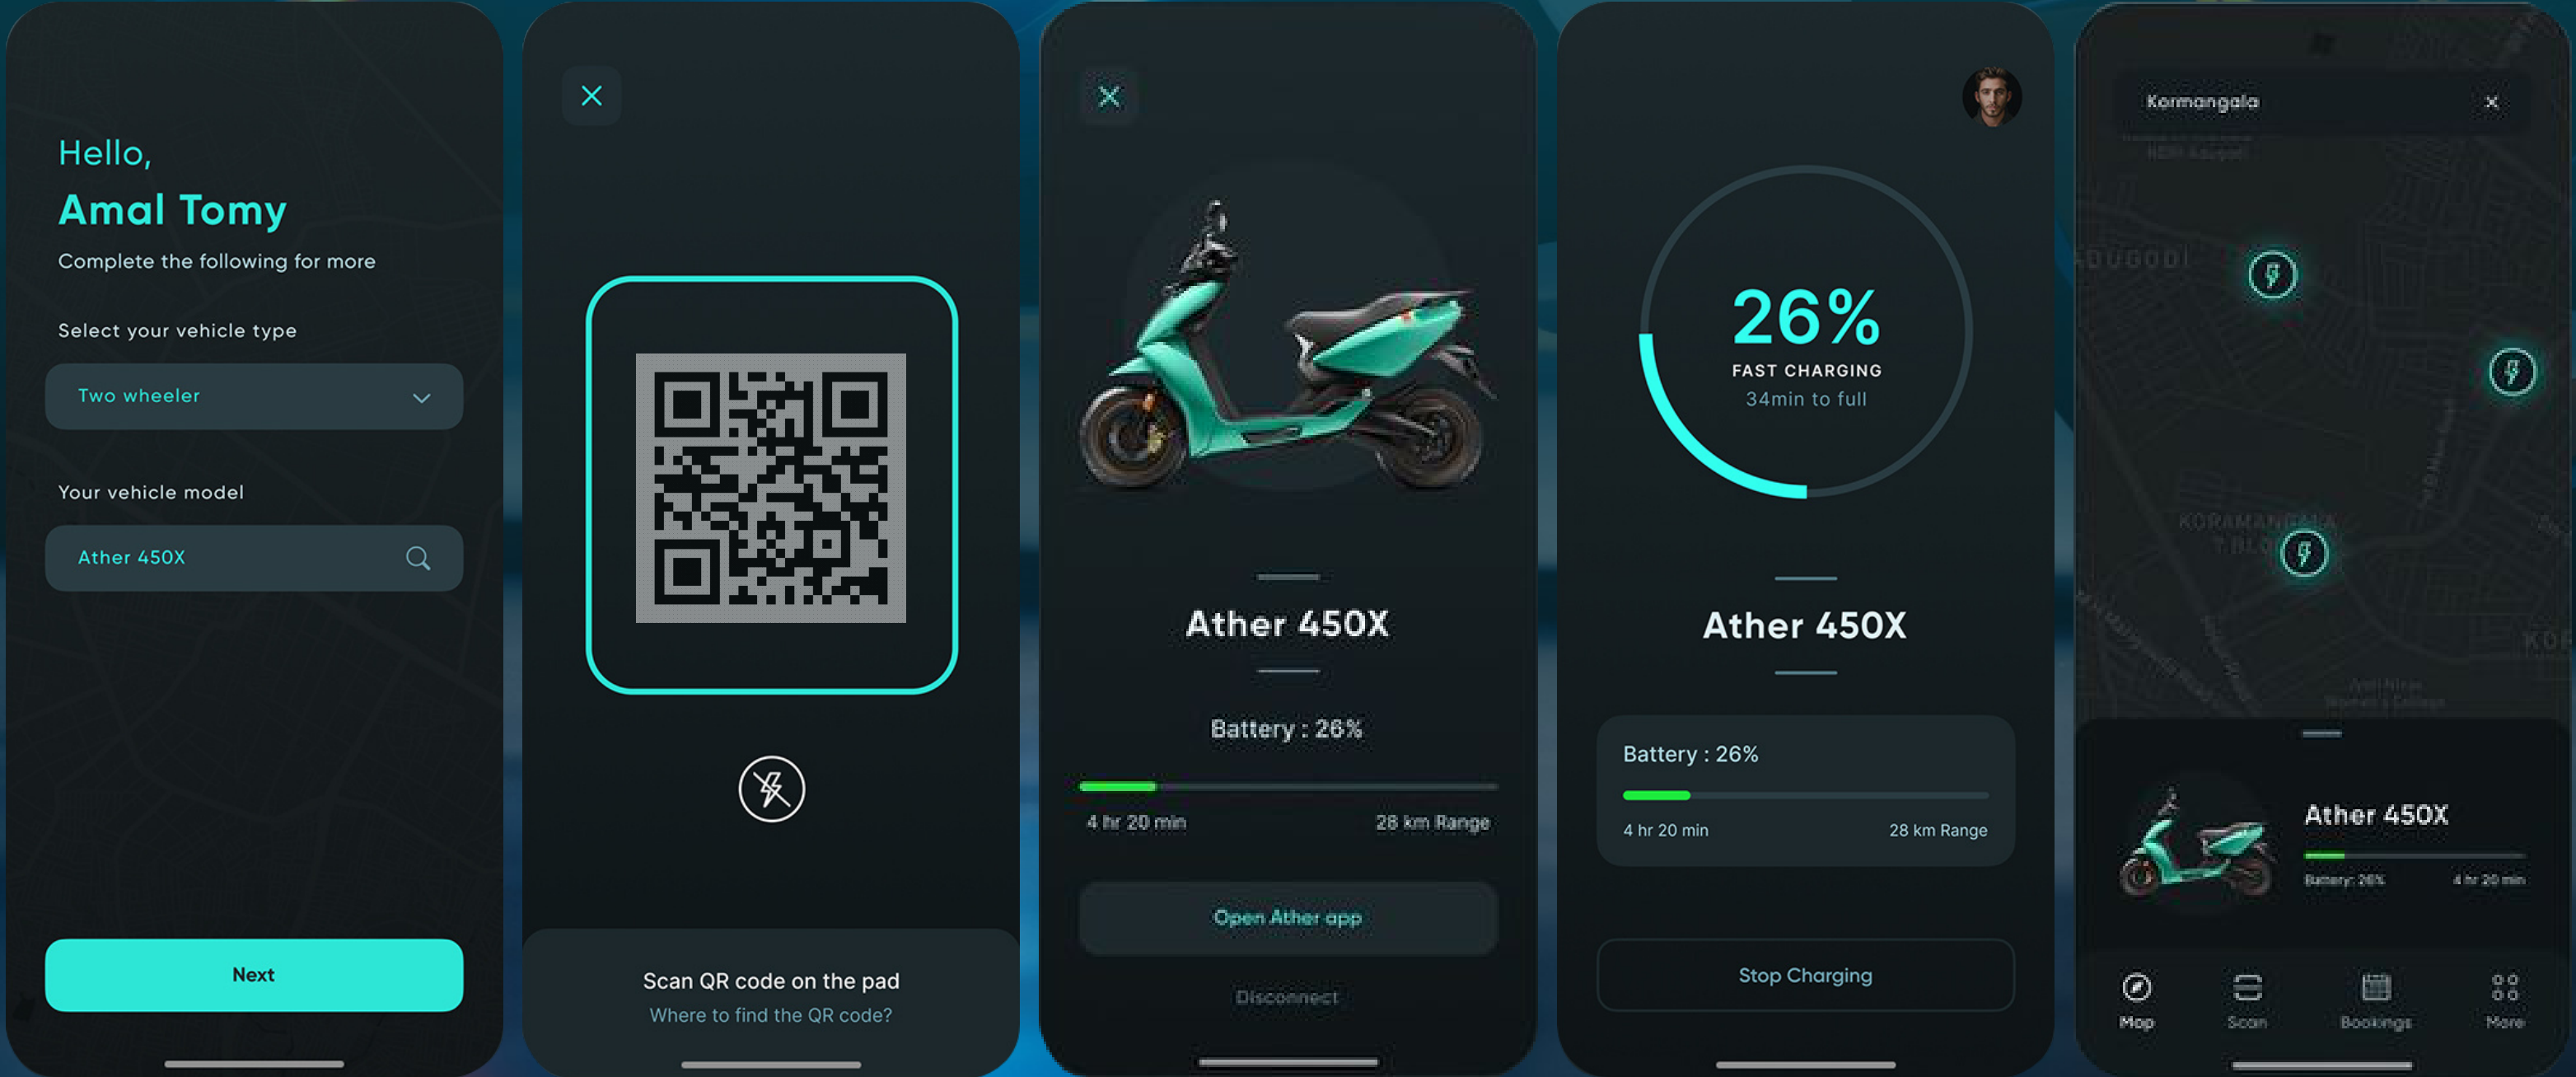

End-to-End Mobility Solutions

- From vehicle delivery, charger installation, to aftersales service
- One-stop solution - no need for multiple vendors

Customized Rental Packages

- Flexible Terms (short, long, or rent-to-own)
- Tailored solutions for logistics, corporate fleet, or individual use

LITHIUM FIRE KILLER

The Next Level Solution In Fire Fighting

The **Lithium Fire Killer** is a non-toxic and environmentally friendly fire protection solution that uses a powerful but safe agent to combat fires.

It protects against a broad range of fire combustion risk from common to complex, industrial, automotive and transportation. The **Lithium Fire Killer** can extinguish fires quickly and efficiently.

Why You Need LFK

- Easy and very fast in extinguishing fires.
- It can prevent re-ignition.
- It can be used with existing water or foam systems without modification.
- Recognized as the most effective medium for wildfire suppression.
- Suitable for firefighting training.
- Easy to deploy by everyday average people.
- It's certified by national to international standard for certifications.

Support Charging Depot

split up to 4 - 7 Vehicles all together (GBT / CCS2)
120 - 360 kWh

Support Charging Device

Split up to 2 vehicle together
(Chademo / CCS2)

50 - 200 kWh
